

After School Enrichment Young Builders

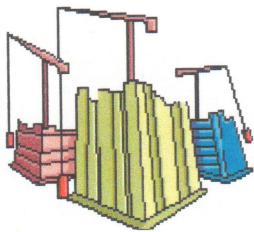

Teacher: Mrs. Zampetti

During this five week enrichment course, participants will learn about architects and engineers while creating towers, bridges, buildings, roadways, and other structures. A variety of materials will be used to design and build. Children will create both individual and group projects. Students will meet an architect, see some of his work, and have a chance to ask questions! Parents will be given a list of related activities and books to continue with this theme at the end of the five weeks.

Thursdays beginning March 1 and ending March 29th
Class Time 12:00-1:30 (Bring Lunch)

Class: \$75.00
Supplies : \$5.00
